VIRGO
The festivities and celebrations of the zodiac
Ruling Planet: MERCURY
Ruling Element: EARTH
August 23 to September 22

The sign of Virgo is ruled by Mercury. Physically it is related to the digestive system. It is said to have a feminine nature, and is therefore more reactive in its energy. As an Earth sign, it is connected with material things and practical manifestation, relating to work, the body and organization principle. As a Mutable sign it is adaptable - and this manifests as a talent for discrimination and analysis. Planets in this sign express themselves in a perfectionistic way, and give rise to a tendency to both criticism and self-criticism. There is a drive to work hard and a strong motivation to be helpful and of service to others. The work principle is exalted, and there is a need to organize people socially in relation to work. There is a tendency to analyze everything and compartmentalize information. The rational mind is dominant, and greater balance could be achieved if the ability to allow fantasy and irrational impulses could be cultivated.

Notable Births on This Day

Lily Tomlin (1939); Yvonne DeCarlo (1922); Jack Hawkins (1910); Gloria Estefan (1958); Edgar Rice Burroughs (1875); Rocky Marciano (1923)
